Investigation on Soil Pollution and the Relation of the Various Types Privies to the Spread of Intestinal Infections, Vol. 15 (Classic Reprint)

By I J Kligler

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Investigation on Soil Pollution and the Relation of the Various Types Privies to the Spread of Intestinal Infections, Vol. 15 The pit privy marks a distinct advance over the open back type. The excreta are concentrated in a single hole and, if the seat fits tightly over the pit, it is comparatively free from flies. But although the possibility of fly distribution and spread by surface wash are greatly reduced, there remains the possible danger of subsoil pollution of the ground-water. The pail type represents an attempt to establish a privy free from any of the objections that apply to the pit privy. The excreta are collected into tight pails which are periodically collected and emptied. Theoretically it ought to be entirely satisfactory. Practically it falls far short of attaining the ideal. It requires too much attention, scavengers are careless, and it is not always fly-tight. The septic privy, or the wet system, is a definite departure from the dry types of closets described above. In all these types the liquefying bacteria are depended upon...
