From B to C 29 3 B to D 53 46 B to E 65 53 From E to F 56 9 G to B 88 12 H to B 28 1 . Adjust the protractor, as shown on the zero line AB, its centre at A. Lay weights on it to keep it in position, and with a needle or a very finely pointed pencil prick off the position of all the angles, marking each point with its distinctive letter. Observe that the angle BAF being too large to be measured by the sextant, the angular distance of F from JE? was taken. To protract the angle, it is added to the angular distance of E from B, and the position of 122 2 (56 9 + 65 53) pricked off. On the other side of the base the angles are recorded as...
